QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

Snow Removal & Deicing Services

Wilmington VA Medical Center – Wilmington, DE

1.0 Introduction

This Quality Assurance Surveillance Plan (QASP) is used to ensure the Contractor performs in accordance with the Performance Work Statement (PWS) for Snow Removal and Deicing Services at the Wilmington VA Medical Center. The QASP outlines performance objectives, acceptable quality levels (AQLs), surveillance methods, documentation expectations, and corrective actions.

2.0 Government Oversight Roles

- Contracting Officer (CO): Authority over contract terms, modifications, and remedies.
- Technical Point of Contact (TPOC): Oversees inspections, performance evaluations, and invoice validation.
- VA Police / Engineering Service: Support winter emergency operations, hazard identification, and campus accessibility.

3.0 Contractor Quality Control

The Contractor shall implement and maintain an internal Quality Control Program ensuring compliance with the PWS, including self-inspections, timely corrections, communication, and operational readiness.

4.0 Performance Requirements & Metrics

The following table outlines the core performance metrics and acceptable quality levels (AQLs).

Performance Area	Objective	Standard	AQL	Surveillance Method
Timeliness of Response	1-hour mobilization; 15-min emergency callback	100% compliance	0 emergency deviations; max 1 non-emergency/mo	Observation; call logs
Snow & Ice Removal Quality	Maintain safe conditions; clear by 6:00 AM	Continuous hazard mitigation	95% overall; 100% critical areas	Daily inspections
Critical Area Maintenance	Priority clearing ADA, emergency, hydrants	No unsafe accumulation	100% compliance	Real-time inspections
Garage Compliance	Use approved chemicals; no metal blades	Zero prohibited materials/equipment	100% compliance	Equipment & garage inspections
Documentation Accuracy	Accurate Snow Control Sheets; NWS data	Zero errors	100% compliance	Invoice review

5.0 Surveillance Methods

Surveillance includes direct observation, structured inspections, random spot checks, document reviews, and feedback from VA staff.

6.0 Documentation, Deficiencies & Corrective Action

The COR may document deficiencies and require immediate corrective actions. Repeated or significant issues may result in contract remedies and/or negative evaluations.

7.0 Invoicing & Payment Controls

Invoices must include TPOC-validated Snow Control Sheets and NWS accumulation data for Mount Holly, NJ.
